YONYOU DIGITAL MANAGEMENT PLATFORM

Yonyou Digital Management Platform is designed to provide a comprehensive and flexible tool for clients to enhance collaboration, streamline operation workflow and improve productivity.

DIGITALIZATION

Digitize paper document in enterprise workflows. Avoid data loss and enhance data accuracy.

INTEGRATION

Integration of operation and business provides total solution for construction industry.

KNOWLEDGE TRANSMISSION

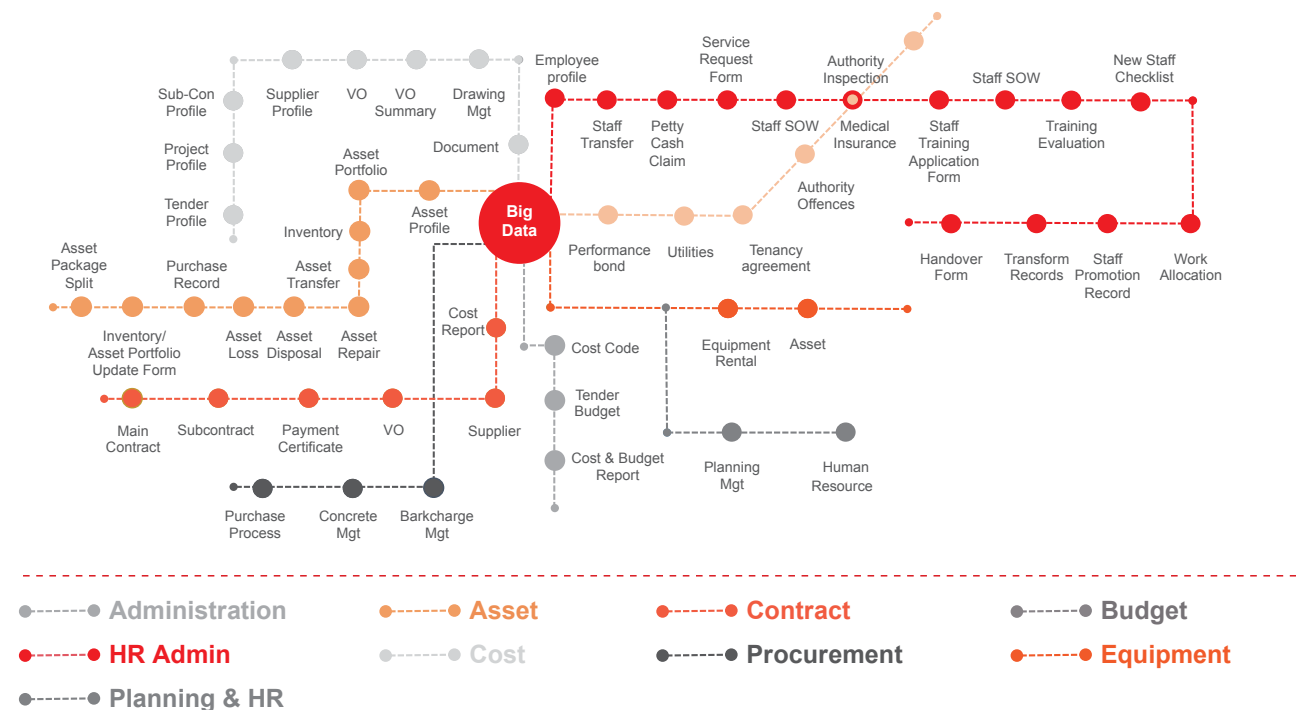

Share knowledge effortless in organization by archiving official documents, project profiles, operational records and publications in hierarchical tree-structure.

COLLABORATION

Provide workflow transparency by enabling seamless communication among internal and external stakeholders.

CONSTRUCTION APPLICATION PROPOSAL

Working with construction industry, Yonyou always provide versatile and powerful solutions for construction digitalization.

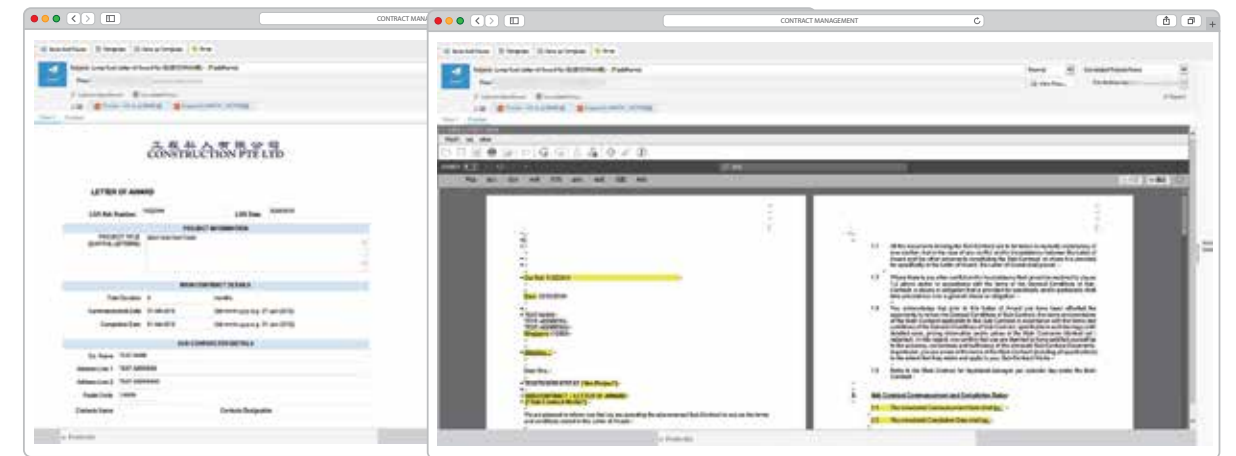

TOTAL SOLUTION FOR CONSTRUCTION INDUSTRY

CONTRACT MANAGEMENT

Empower enterprise to proactively manage contractual obligations and changes in contract specification.

Key Features:

- Facilitate **collaboration with relevant stakeholders** for documentation preparation, contract status tracking and budget control
- Auto-generate** project profiles upon contract approval, avoid duplicate data input
- Record and trace** payment details based on contract information
- Provide intuitively statistical tables

SUB-CON MANAGEMENT

Promote consistency in managing subcontractors across functions, mitigates risk and improves productivity.

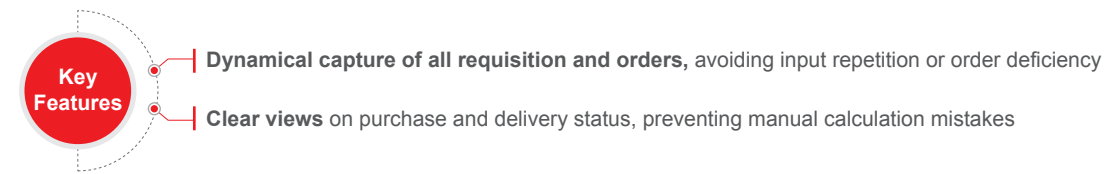

Key Features:

- Provide convenience in maintaining subcon profiles, contract information and past project records
- Allow **seamless internal-external collaboration** on one business process
- Perform payment and claim submission on **one integrated platform** to reduce unnecessary time cost
- Protect sensitive internal business processes information through **restricted authorization control** on external personnel portal

						SUB-TOTAL FOR NEW VO AMOUNT	18,750.00	0.00	18,750.00	0.00	18,750.00

PROCUREMENT MANAGEMENT

Help to streamline companies' procurement processes, from material requisition to goods receive. Offer Real time reports and statistics that indicate the requisition and purchase progresses.

ON-SITE MANAGEMENT

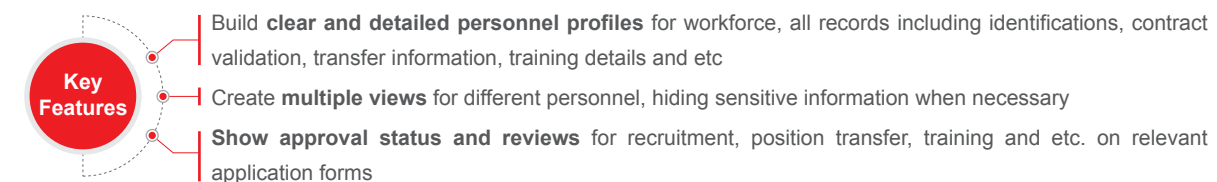

Provide comprehensive Safety, Quality, Environment, Defects and In Process Audit management through flexible digitalization tool.

- Key Features:**
- Real-time communication between site and back office through mobile App, avoiding inconvenience of using laptop on site
 - Digitalization of all required site regulating documents, achieving paperless on-site management
 - View on-site pictures taken by phone directly on corresponding forms
 - Time saved on information transmission by using integrated knowledge center

WORKFORCE MANAGEMENT

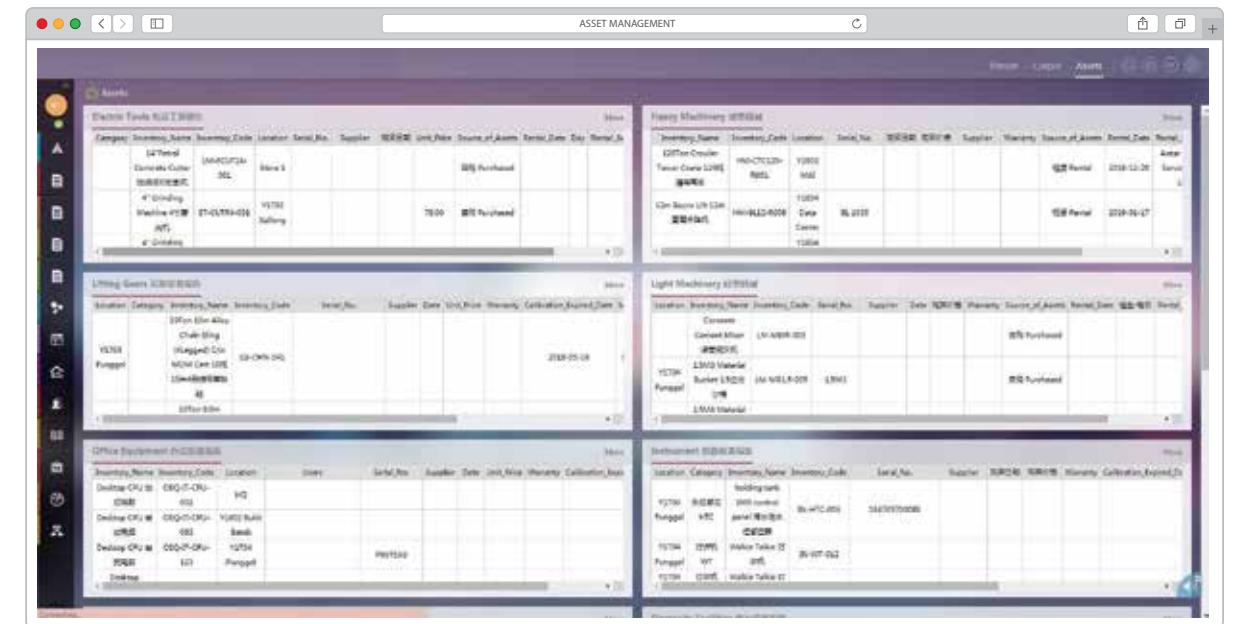

Designed to match more than just general workforce management requirements, but of particular needs seated in Construction Industry.

ASSET MANAGEMENT

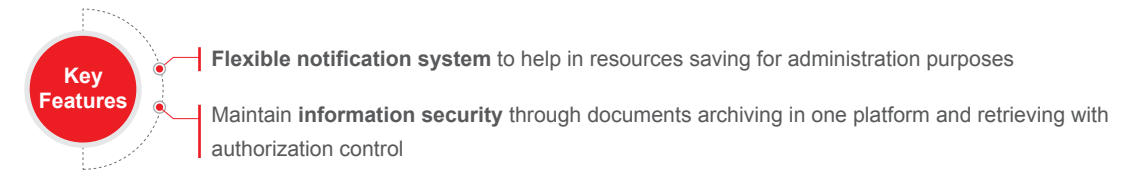

Offer a clear view of assets summary for each project and detailed purchase or maintenance history for each asset.

- Key Features:**
- Track the life cycle of assets by building Inventory&Asset profiles
 - Better regulate and allocate Inventory&Asset resources
 - Document assets usage associated with process flows for easy history query
 - Real-time updates of Inventory&Asset status and statistic reports for comprehensive control

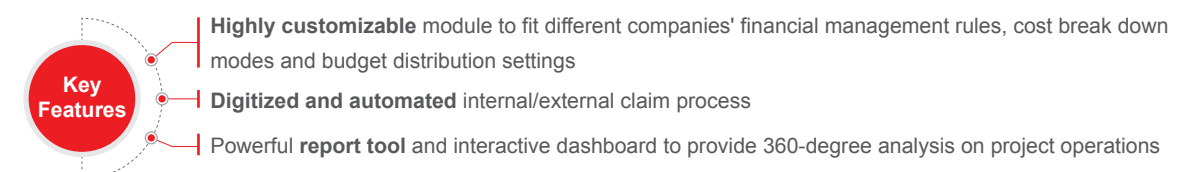

ADMINISTRATION

Facilitate admin works including not only daily request like stationery or company vehicle application, but also insurance, services, dormitory management and authority offences.

FINANCE MANAGEMENT

Allows enterprise to have an overall control on BUDGET and COST in multi-dimension.

CUSTOMER SUCCESS CASE-BHCC

BHCC Holding Limited is principally engaged as a main contractor in the provision of building and construction works in Singapore. Established in year 2003, BHCC Holding Limited has over 400 employees and more than 15 years of experience in building and construction works for various types of buildings including educational institutions, residential, commercial and industrial buildings in both public and private sectors.

Asset Management

- Isolated Information
- Paper documents
- Untraceable Record

Contract Management

- Time-consuming contract evaluation process
- Inaccurate manual work flow

Subcon Payment/Claim Management

- Time consuming Claim and Payment process
- Tedious site verification and approval process

Drawing Management

- Delay on drawing updates
- Information Assymetry

VALUE EMBODIMENT

Asset Management

- Digitalize all relevant data records on one platform
- Automate asset management life cycle
- Maintain intact and detailed asset profiles for unification
- Reduce redundant communication with live data

Contract Management

- Contract staff only needs to modify designated content of the contract
- Sensitive documents are preserved within the department under permission control

Subcon Payment/Claim Management

- Digitalized claim and payment process shortens operation process
- Real time reports and statistics clearly present the approval progresses
- External stakeholders can join into the working flow
- Streamline the operation processes and improve efficiency

Drawing Management

- A centralized platform to access drawings anytime/anywhere
- Strict authorization control on drawing submission and action logs to avoid information mismatch
